

Megan Arlt

UX/UI & Graphic Designer

About

Welcome.

My name is Megan, and I am currently a senior at Michigan State University.

After 4 years of studying Applied Engineering with a concentration in Computer Science and an Engineering Internship I switched my major to Media and Information with a minor in Graphic Design. I couldn't be happier about the change.

I am a hard working individual with a great attention to detail. I enjoy new and challenging projects that push me to learn more in the great field of design. Through college and previous work experiences, I have gained great time management skills that allow me to work on multiple projects at once.

In my free time I enjoy just about anything that involves the outdoors.
